

# Central Desktop Extranets for Salesforce.com AppExchange Product Data Sheet

## Product Summary

Central Desktop is an easy to use "do-it -yourself" collaboration platform that enables Salesforce users to create personalized Customer Extranets and Partner Portals. Central Desktop brings wiki technology to Salesforce users in a structured, permission-based environment that is easily adaptable to your specific business needs.

Central Desktop provides a professional user-experience when collaborating with customers and partners by allowing Salesforce users to invite their customers into a private, invitation-only extranet.
